ABSTRACT.- *Strategies of Protection and Valorization of the Historical Cultural Landscapes.* The paper presents the steps in elaborating this strategy. Because of the rapid dynamics in the evolution of landscapes, an inventory of landscapes and their elements must be done first, followed by the elaboration of a legislation with special reference to the protection of the geographical landscapes. In the protection and valorization strategy, a primordial place comes to the development of some networks of actors, from which responsibility factors coming from local and regional administration, NGOs and research units must take part into.
